

TOP AQUA WATER
in its
purest form

Active health protection with a lifelong guarantee

drinking water for you and your family

Innovative filter systems for the
best and purest water quality

WATER IN ITS FULL POWER FOR MORE QUALITY OF LIFE

Best quality through a mature technical system, space-saving, powerful and efficient.
Drinking water as usual - an absolute added value for life...

All advantages at a glance

The innovative and very compact design of the TopAqua devices not only offers you the usual security of the best and purest drinking water quality, but can also be installed under any sink or in the skirting board thanks to the narrow design.

- 1 A special pump technology ensures a particularly long service life and the best performance for consumption and performance.
- 2 Everything always at a glance - integrated monitoring and testing instruments such as service, quality, current, pressure and temperature indicators ensure trouble-free operation.
- 3 With the design fitting included in the scope of delivery or the optional 4-way fitting, you can tap your own TopAqua water as much and as often as you want.

Organically mineralized

Over-acidification of the organism is one of the greatest dangers to our health and our modern way of life contributes to over-acidification. This has a direct impact on the functionality of our organs, muscles and joints.

Your drinking water is naturally enriched with biologically usable sodium, potassium, calcium, magnesium and other important minerals and trace elements. This raises the pH value and largely compensates for the loss of basic minerals.

With the 2-way fitting (ill. 1) or the optional 4-way fitting, you can decide between only filtered water or additionally mineralized water.

We combine elegant design with excellent performance and the best quality

Since the TopAqua Direct Flow technology automatically, electronically controlled, regularly flushes out the standing water in the system, living germs in the tap water cannot settle on the membrane and grow through.

In contrast to conventional tank systems, the water is never exposed to longer downtimes, so the risk of contamination in the tank is excluded. Thanks to sophisticated technology, the TopAqua Direct Flow systems are more economical than almost any other system.

WATER BEINGS HUMAN SEASONS OF LIFE

TopAqua accompanies you through all of them with the best drinking water seasons of your life

Right from the start, an adequate supply of water to our cells is the basis for a healthy and vital life.

Are the tissues and organs in our **spring of life** still largely unencumbered by harmful deposits, the so-called "slags", this changes with increasing age, in some cases strikingly.

Already in our thirties, in **Summer** of our life, fat and connective tissue are often filled with deposits, which can lead to unnecessary impairments and partial failure of a healthy cell and thus vital function in the further course of life. The first consequences of the onset of internal drying out (dehydration) become apparent, the elasticity decreases noticeably and the complexion of the skin begins to change.

im beginning **Autumn** our lives, the vessel walls are brittle, muscles and cartilage are filled with deposits, vessels are partially filled with arteriosclerosis. Mobility, strength and endurance decrease significantly.

The **winter of life** is characterized by frequent pain, one "shrinks" considerably due to lack of water and is often dependent on help with everyday activities. Mental and physical decline leads to increasing dependency.

The intensive cell washing that takes place with TopAqua-cleaned drinking water can make an important contribution to maintaining health and vitality.

The connective tissue is the landfill of the body

Everything that cannot be excreted is stored in the connective tissue. In order to be able to remove the "garbage", the so-called slag, from the body, you need a good solvent: pure, living water like in nature.

So that you don't dry out and the Cell supply works well

The fluid balance must be replenished regularly because the human body cannot store water. This allows the vital metabolic processes to run without restrictions. It is important to have a balanced intake of fluids, which is distributed throughout the day.

Based on the apples, you can get an idea of what happens when there is not enough water left. Pure water ensures a balanced and permanent cell wash, creating new deposits in the cells can be effectively prevented and existing deposits can be loosened and removed. A plump, healthy complexion is a great sign when your cells are properly hydrated.

Drinking water from TopAqua, a life-changing choice

TOPAQUA DIAMOND CLEANSING & VITALIZATION

cleaning

Vital water of the highest spring water quality can only be produced through optimal raw water purification.

The most modern membrane technology removes up to 99.9% of the pollutants from the water. Water is passed through semi-permeable membranes and harmful substances are retained.

vitalization

After the drinking water has been cleaned, the water is made receptive to organic minerals and trace elements and is also mixed with the previously deleted substances.

The vitalization creates structured drinking water that has an antioxidant effect and also contains very small water molecule clusters. With this fine structure, 80 to 90% of TopAqua drinking water reaches the inside of the cells! It can thus effectively protect healthy cell tissue.

TOPAQUA DIAMOND AN INVESTMENT IN YOUR HEALTH

Your claim - Fresh, pure drinking water

TopAqua Diamond frees the tap water from possible unwanted foreign substances and thus ensures the quality.

No matter how polluted the tap water could be in the future. You always have your own quality assurance and thus an "airbag" on your water pipe!

removes problem substances such as:

- heavy metals
- viruses and bacteria**
- parasites
- nitrates and nitrites**
- crop protection products
- hormones**
- drug residues
- microplastics**
- solvent
- other harmful substances

Fresh, healthy water in spring water quality straight from the water tap.

Revitalized water by restructuring the water clusters.

Fine-tasting, higher-quality drinks and food.

No more lugging around bottled water. No pollution from PET bottles.

It has been proven that coffee machines and kettles no longer calcify.

Careful treatment of the environment and water resources.

TOPAQUA DIAMOND PERFORMANCE FEATURES

- √ Most compact molecular direct filtration system
- √ Housing painted several times
- √ High-performance pump 230 V
- √ pressure monitoring
- √ Permanent monitoring of the water quality Automatic
- √ membrane rinsing
- √ Food-safe lines and connections
- √ Permanently cleaned / vitalised drinking water
- √ Withdrawal volume up to 1.6 ltr. per minute
- √ Most economical water consumption
- √ 2-fold aqua stop
- √ Vertical and horizontal installation possible
- √ 2 high-performance membranes 180 GPD
- √ vitalization module for special enrichment with organic minerals
- √ Vital water has particularly small water molecules and binds free radicals

**examination
the water quality**

pressure monitoring

**compact
direct molecular filtration**

Technical specifications

pump	230V
Broad	10.5 cm
Height	46.5 cm
depth	45.5 cm
withdrawal quantity	approx. 1.6 l/min.*
Weight	approx. 8.5 kg
operating pressure	max. 4 bars

*Max. withdrawal quantity depending on the different resistances of the fittings used and connected devices.
The flow rate can therefore be lower.

ill. 1

ill. 2

Installation with a separate tap (ill. 1 top right)

Installation with a 4-way fitting (ill. 2 right below)

NATURAL FILTRATION

Best quality through a mature technical system, space-saving, powerful and efficient. Drinking water like before - an absolute added value for life...
